

**A. AMENDMENTS TO THE SPECIFICATION**

[0028] Turning now to Figures 4-13, the engine 7 has a cam cover 200. The cam cover 200 encloses the rocker arms assemblies 8 and 9. The cam cover has a bottom surface 202 for mating with a top surface 206 of the head 2. Captured between the cam cover ~~202~~ 200 and the head 2 is a gasket 207. The gasket is fabricated on a first soft polymeric material 210. Typically, such material may be glass field nylon. The gasket soft material 210 has in its bottom end a rectangular shape pocket 214. The pocket 214 has inserted therein a second polymeric material 218. The second polymeric material can be a rubber such as Plumley 10-1316-2.
